

AGgentic AI Analysis, Advice, and Support

Lack Of Expert Advice

- Inefficient crop planning.
- Soil degradation.
- Pest & disease Mismanagement.
- Overuse or underuse of inputs.
- Poor yield predictions.
- Supply chain inefficiencies.
- Financial struggles.
- Labor management issues.

Lack of Actionable Data

- Unoptimized irrigation.
- Soil health decline.
- Pest & disease outbreaks.
- Inaccurate yield predictions.
- Inefficient resource use.
- Market timing issues.
- Supply chain disruptions.
- Labor mismanagement .
- Regulatory & compliance risks.

Lack of Market Access

- Limited sales opportunities.
- Low profit ,argins.
- Dependence on middlemen.
- Market volatility.
- Oversupply & food waste.
- High distribution costs.
- Lack of price transparency.
- Difficulty entering new markets.
- Seasonal revenue gaps.

Agricultural AI Agent

Autonomous AI agents optimizing every step from soil to sale, increasing efficiency, profitability, and sustainability.

Live Monitoring Dashboards

AI driven IoT, LIDAR, & satellite data.

B2B Farm to Table Marketplace

Farmers directly connected with buyers.

3 Year North America Projections

T.A.M.
2,200K farms

S.A.M.
1,800K farms gross > \$500K / yr

S.O.M.
600,0000 farms

Farm-to-table Market Growth

Expected to reach \$27.02 Billion by 2027
(Markets and Markets).

US. Food service Industry Expansion

Valued at \$824.61 Billion in 2022, projected to grow to
\$1.77 Trillion by 2030 with 10.03% CAGR.

10-year Global Projections

- +10% increase in world population.
- +11% rise in global meat consumption.
- +18% growth in global crop consumption.

Monitoring systems based on user inputs & passive data analysis.

\$182.7M / Year

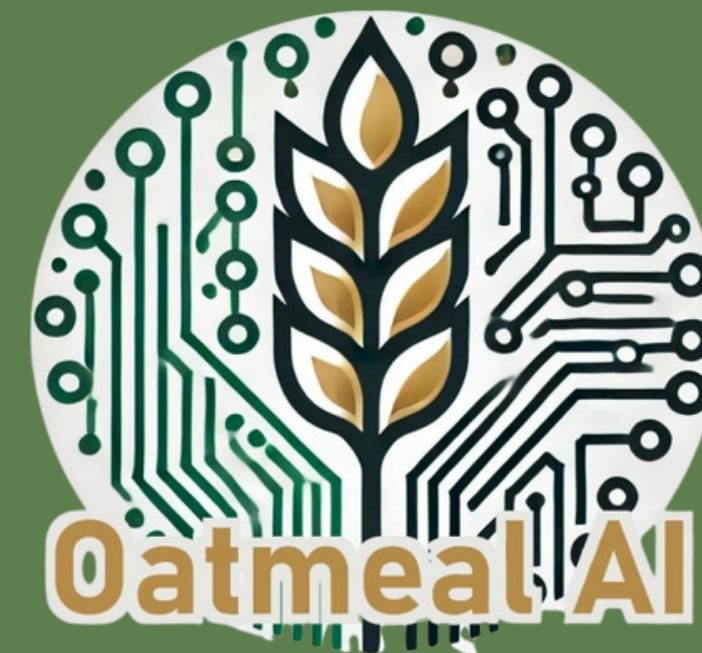

\$63M / Year

\$15M / Year

Proactive A.I. Agents providing live data analysis & personalized advice based on IOT sensors & satellite data.

Why We Win

- Only complete farm-to-market solution
- Most advanced AI capabilities
- Lowest entry price point
- True automated decision-making

Seedling Plan

(\$49/Month)

- Essential irrigation guidance
- Fertilizer application recommendations
- Weather monitoring with real-time alerts
- Limited access to market trend insights
- Basic task scheduling and workforce planning

Sprout Plan

(\$119/Month)

- All Seeding Plan features
- AI-driven irrigation & fertilizer optimization
- Nationwide market analytics
- Direct farm-to-market connections
- AI-powered marketing assistant
- Workforce management & compliance tools
- Automated dairy farm operations

Harvest Plan

(\$499/Month)

- All Growth Plan features
- Real-time dynamic pricing tools
- Advanced supply chain & procurement optimization
- Custom dashboards with in-depth analytics
- Third-party system integration (ERP, accounting, etc.)
- Priority customer support

John Andresen
CEO

>25 years in online Ag marketing.

Manager, software engineer, manufacturing engineer, product manager, & project manager at HP, ENRON, & Intel.

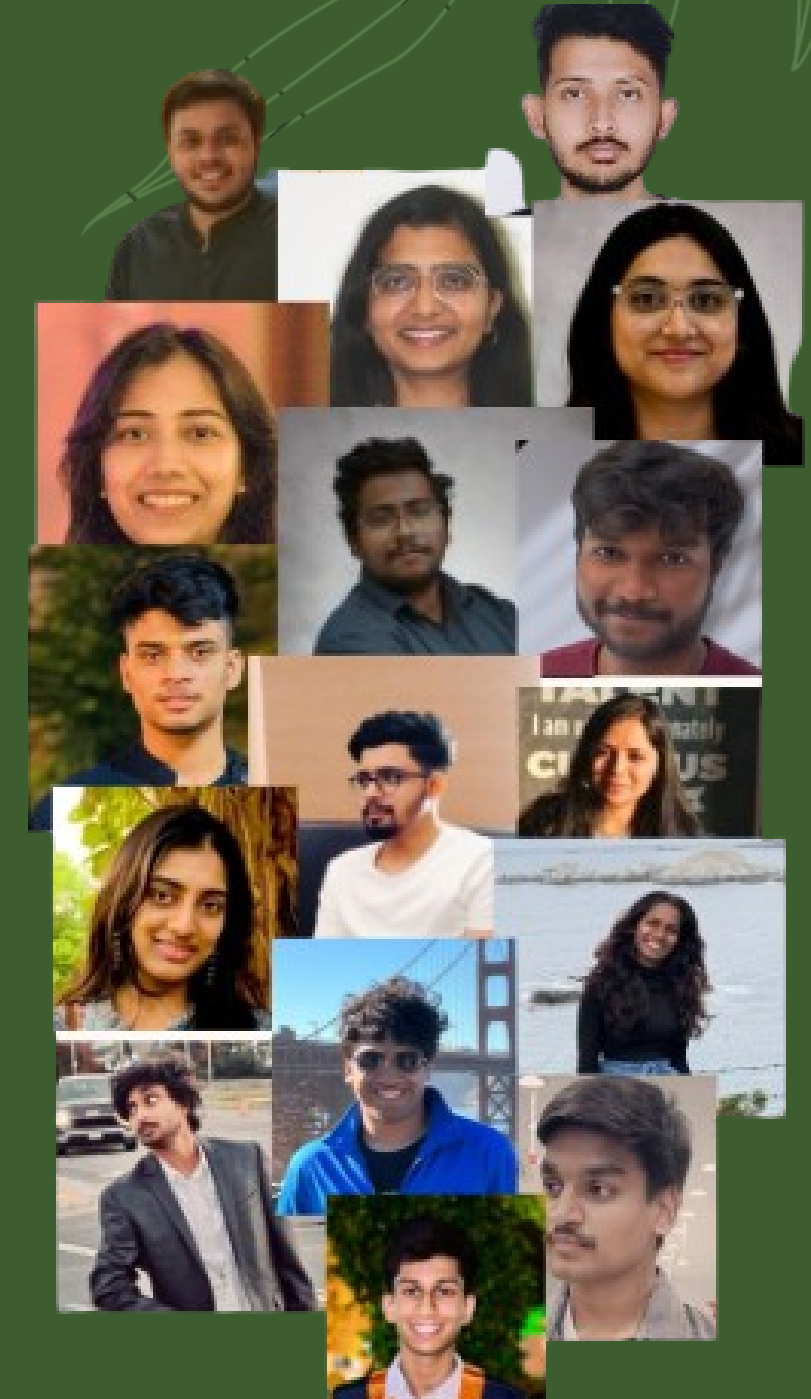

Raghav Gupta
CTO

Business analytics leader with expertise in data engineering, supply chain optimization, and GenAI applications. MS in Business Analytics. Experience in AI development at Apexon.

Marshall Doak
Co-Founder

>40 years in Ag. And Biz development
Director, Controller, Ops Manager, Grower, Production Manager in operations of various scales, from solo ventures to organizations up to 225 employees.

20 Data Analysts /
AI Developers

Q1 '25

- Crop yield tracking & predictions.
- Nutrient management & planting Advice.
- Regional farm visualizations.

Q2 '25

- Proactive advice on precision planting, pest & disease prediction.
- Farm specific visualizations.
- Directory, & marketplace visualizations.
- MVP Farm 2 Table marketplace.

Q3 '25

- IOT Sensory integration & drone integration.
- MVP Farm 2 Table agent.
- Website visualizations.
- Complete Farm 2 Table marketplace

Q4 '25

- Conversational AI with personality & voice.
- Animated Interface.
- Completed Farm 2 Table Agent.
- Marketing visualizations.
